

**Line Intersection (Alternative)**

$$a_1x + b_1y = c_1$$

$$a_2x + b_2y = c_2$$

**Question.** Given two (general form) lines, what values of  $x$  and  $y$  satisfy *both* equations?

This is the same question

# Line Intersection (Alternative)

$$a_1x + b_1y = c_1$$

$$a_2x + b_2y = c_2$$

**Question.** Given two (general form) lines, what values of  $x$  and  $y$  satisfy ***both*** equations?

This is the same question

# Motivation

1. Lines and line intersections
2. An example from chemistry
